This fee together with fine, if any, should be deposited into a Government Treasury or Sub-Treasury in Bengal and the chalan showing the deposit should be attached to the application which must reach this office on or before the prescribed date. All examinees must obtain admit cards from the Inspector's office, which should be shown to the Superintendent of the Examination Hall on the first day of the examination. *In no circumstances will the admission fee be refunded.*

The following provisional Census Table, issued by the Superintendent of Census Operations, Bengal, is published for general information :—

IMPERIAL TABLE XVII.—Caste, tribe, race, nationality or Muslim social group.

This table corresponds to imperial table XIII of 1921, but for reasons of public economy there has been some modification of the principle on which groups shown have been chosen. Amongst Muslims only 3 groups are distinguished : these are (a) 'Mumin' (Jolahas), some of the leading men amongst whom desired that separate figures should be presented for their group ; (b) Sayyads; and (c) Others : figures for these groups are to be sought as subsidiary details to the total of Muslims given as group No. 106 in the table. Other groups than Muslims are mainly Hindu castes. In 1921 details were given for all castes having or approaching 1 per mille of the population and further details were given in an appendix to the table for groups only found in certain parts of the province. On the present occasion sorting for Hindus was confined to those groups forming 4 mille of the population in 1921 unless they were of the 'depressed classes' or were included for some other particular reason, e.g., the Rajputs and Malis added at the direction of the Census Commissioner. Hill tribes and groups of aboriginal derivation, whether completely or partly or not at all hinduised were also included and appear in the table. The restricted sort for this table results in the omission of particulars for the following groups shown either in the table or in its appendix in 1921. Muslim groups are distinguished with an asterisk.

2. An innovation is the presentation of figures for those who gave no return of caste—these figures include not only outcastes and some prostitutes but also a number who repudiate the caste system or declined to return their caste upon conviction or for some other reason. For tribes professing more than one religion subsidiary figures are given for each religion returned. In addition to the name chosen to give groups their alphabetical position, other caste names are also given in brackets in some cases. All persons returned under any of these designations are included in the figures of the group although some of the names are new coinages current nowhere outside the caste claiming them, whilst others (e.g., Chandal) have probably fallen out of use entirely and were returned only to ensure that such returns if made might not be overlooked. Figures for sub-castes returned by Brahmans are given in a supplement after the table.

3. In the result the table shows figures for 48,958,198 persons in Bengal and 108,948 persons in Sikkim out of a total population of 51,087,338 and 109,808, respectively. The composition of the numbers not included in this table is given summarily below by religion and (so far as is shown in other tables) by race:

	BENGAL.			SIKKIM.		
	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.

1. Jains	8,432	6,160	2,272
2. Sikhs	7,264	5,369	1,895
3. Jews	1,807	967	840
4. Parsis	1,520	897	623
5. Anglo-Indians	27,573	14,182	13,391
6. Chinese	1,494	1,226	268

7. Europeans and allied races	23,030	14,492	8,538	8	4	4
8. Indian Christians	100,777	52,235	48,542	225	115	110
9. Indians of indefinite belief	125	80	45
10. Christians of 'Other races'	553	330	223
11. Hindus	1,809,015	1,002,597	806,418	337	189	149
12. Tribal religions	23,921	12,374	11,547	80	40	34
13. Buddhists	128,469	60,186	68,303	208	122	86

The first nine groups do not come under caste divisions at all and in the case of Jains, Sikhs, Jews, Parsis, Anglo-Indians, Indian Christians and Indians of indefinite beliefs the race can be deduced from the description. Similarly most persons returned as 'Confucians' may be reasonably assumed to be Chinese as well as those specifically so returned. For Europeans and allied races details are shown by British nationality in imperial table XIX. Table XIX also gives the detailed distribution of Anglo-Indians which can moreover be found in the title page and supplement No. II to imperial table XVI. The detailed distribution by districts of Jains, Sikhs, Jews, Parsis, Chinese (both those so returned and also Confucians), Indian Christians, Christians of 'Other races' and Indians of indefinite beliefs can also be found in imperial table XVI or its supplements and title page. An analysis of all Indian Christians by racial, tribal or provincial affiliation is given for the total number in Bengal and Sikkim in the supplement to imperial table VIII and a subsidiary table to Chapter IX of the report. The only groups therefore in the above list for which no figures whatever are recorded by race, caste or tribe are Nos. 10-13. These form a total of 1,957,058 in Bengal and 625 in Sikkim or less than 384 and 57 respectively in each 10,000 of the total population.

The College is situated in the midst of an extensive compound of over 100 bighas containing a large number of play-grounds. There is provision for all outdoor and indoor games. The College provides well-appointed common reading rooms for the use of the students, who receive individual attention both in their studies and their games. Arrangements have been made to divide the boys into groups and place them under the effective and intimate guardianship of their teachers. There is a fine new two-storied Hindu hostel in the College compound, and hostel charges (including rent, furniture, light and medical attendance) do not exceed Rs. 14 a month. The boarders keep excellent health, and the general health in the town is also now quite good. There is also a Muhammadan hostel attached to the College.

A considerable number of Government and private free-studentships and stipends is awarded every year in August or September to poor but deserving students of the College.

For prospectus and admission form, apply enclosing stamped and addressed envelopes to the Professor-in-charge, Krishnagar College.

DEPARTMENT OF AGRICULTURE, BENGAL.

PRELIMINARY FORECAST OF THE JUTE CROP OF BENGAL, 1932.

[NOTE.—On an average of the five years ending 1929-30, the area under jute in Bengal, to which this forecast relates, represents some 86·3 per cent. of the total area under jute in British India.]

The Preliminary Forecast deals only with the estimates of area sown and the condition of the crop at the time of publication of the forecast. The estimates of area are based on information received through the Collectors from the Revenue staff; also from Panchayets and Agricultural Officers.

Area sown in 1932.—In Bengal, returns for the present season show a total area of 1,638,900 acres, an increase of about 25,200 acres, or about 1·6 per cent. as compared with the figures for 1931.

Character of the season.—At the outset the weather was favourable for sowings in certain low-land tracts of East Bengal, but drought, which extended up till the middle of April, interfered with the progress of the operation. In North Bengal sowings commenced late in consequence. Since then conditions have been favourable for field operations and for the growth of the young crop generally. Good rainfall in the latter part of May facilitated sowings in West and parts of North Bengal.

Present state of the crop.—The present state of the crop is favourable on the whole.

Stocks.—Large stocks of old jute are reported from several districts.

DEPARTMENT OF AGRICULTURE, BIHAR, AND ORISSA.

PRELIMINARY FORECAST OF THE JUTE CROP OF BIHAR AND ORISSA, 1932.

[NOTE.—On an average of the five years ending 1929-30, the area under jute in which Bihar and Orissa Forecast relates, represents about 7·8 per cent. of the total area under jute in British India.]

The present forecast deals only with the estimated area sown. It gives also a general survey of prospects, but makes no reference to the probable outturn either in percentage figures or in bales.

2. **Acreage.**—I estimate the area sown during the current and four preceding years in round numbers as follows:—

Year.	Acreage.
1928	... 247,000
1929	... 238,000
1930	... 238,000
1931	... 148,800-
1932	... 157,000

3. **Weather conditions.**—In March light rain fell in Cuttack and Balasore. There was no rain in the remaining jute districts. The fall was below the normal in these two districts. In April light rain fell in all the jute districts. The fall was above the normal everywhere except Champaran, the Santal Parganas and Cuttack. In May light to moderate rain fell in all the jute districts. The fall was below the normal everywhere except Balasore. In June rain fell in all the jute districts. The fall was light everywhere except Darbhanga where it was moderate. The weather conditions are reported to be not favourable in the important districts of Purnea and also in Darbhanga owing to insufficiency of rain. Sowings are still going on in Cuttack and Balasore.

4. **District returns.**—Last year's area under jute was finally estimated at 148,800 acres. The total area under jute this year is estimated by District Officers in round number at 157,000 acres. This estimate appears to be fairly correct. The increase in comparison with last year is due to the marked fall in the prices of food-grains and also a possible expected rise in jute prices this year.

5. **Condition and prospects.**—The condition of the crop is fair.

6. **General.**—The quantity of jute which remains in the jute districts from the crops of 1931 is reported to be small, except in Bhagalpur and in parts of Purnea, where large stocks are reported to be still in hand.

The statement below compares the estimated area under jute in this province this year with the preliminary and final figures of last year:—

Preliminary forecast of the jute crop of Bihar and Orissa for 1932.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Estimated normal area under jute. (The figure arrived at by taking the average of 10 years immediately preceding the year to which this forecast relates.)	Estimated area under jute.		Whether much, little or no jute remains in the district from the crop of 1931.	Date by which the sowing of the crop generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
					Last year (1931) final figure.	This year (1932).			
1	2	3	4	5	6	7	8	9	10
Bihar	Champaran	2,263,194	430,200	2,900	2,500	2,500	Middle of April ..	The weather and rainfall have been favourable. The present condition of the crop is fair. The sowings were normal and have been completed. The crop is expected to be the same as that of last year.
	Muzaffarpur	1,634,630	1,627,000	2,700	4,000	3,305	March ..	The condition of the crop is fair. The date of sowing was normal.
	Darbhanga	2,142,720	1,677,800	1,600	312	1,041	Nil	May and June ..	The prospect of the crop is not good at present owing to scanty rainfall.
	Bhagalpur	2,661,120	1,684,100	2,700	2,075	1,167	Much ..	Last week of April. (Normal).	The decrease in the area under jute this year is due to the present low price of the crop.
Orissa	Purnea	3,196,160	1,664,400	178,800	120,000	130,000	Much in Araria. Little in Sadar and Kishanganj.	May 1932 ..	The weather and rainfall have not been favourable. The present condition of the crop is fair. The sowings were late at places for want of timely rainfall while at others they were normal where sown in low lands. Those sown timely on high lands had to suffer for want of rains or did not germinate at all. The crop will suffer more if there be no sufficient rains soon. The increase in area under the crop is due to the marked fall in the prices of food grains (particularly paddy) and also the expected rise in the price of jute this year.
	Santal Parganas	3,500,800	1,717,900	1,000	500	500	Very little ..	Last week of May ..	The date of sowing was normal.

DEPARTMENT OF AGRICULTURE, ASSAM.

PRELIMINARY FORECAST OF THE JUTE CROP OF ASSAM, 1932.

[NOTE.—On the average of the five years ending 1929-30 the area under jute in Assam represents 5.0 per cent. of the total area under jute in British India.]

1. **Season.**—The weather has been generally favourable for the cultivation and growth of the crop, except in the upper districts of the Assam Valley where heavy rains have retarded the growth of the young plants. Some damage by hailstorms has also been reported in the Goalpara district. The present condition of the crop is, however, generally satisfactory and a better outturn than that of last year is expected in all the important jute growing districts with the exception of Darrang.

2. **Area sown.**—The total area under jute as estimated by the Deputy Commissioners is 107,100 acres against 99,300 acres (revised) of last year. There is an increase in area in Sylhet, Nowgong and Garo Hills, while Goalpara, Kamrup, Darrang, Sibsagar and Lakhimpur show a decrease in area, the net increase over last year's final figure being 7,800 acres.

3. **Stock.**—According to the reports of the Deputy Commissioners little jute remains in stock from last year's crop except in the districts of Nowgong and Darrang.

Cachar ..	200	200	200	None ..	First week of April. Normal.	The weather has been favourable for the cultivation and growth of the crop. The present condition of the crop is good and the outturn is expected to be better than that of last year.
Sylhet ..	15,000	5,000	12,000	7,000	..	Little ..	Middle of April. Normal.	Favourable weather conditions at sowing time account for the increase in area. The present condition of the crop is fair and a better outturn than that of last year is expected.
Alpara ..	60,000	35,300	32,700	..	2,600	A small quantity remains.	First part of April. Normal.	The decrease in area is due to the low price of jute. The weather has been favourable for the growth of the crop and the outturn is expected to be better than that of last year. Hailstorms caused some damage in places.
Kamrup ..	28,000	19,100	18,000	..	1,100	Little ..	Beginning of April. Normal.	The decrease in area is due partly to relinquishment of jute growing land by the Kumari-khata Estate and partly to the general fall in price of jute. The weather at sowing time was not very favourable but has since improved, and the present condition of the crop is good. The outturn is expected to be normal.
Darrang ..	12,600	13,700	12,200	..	1,500	About a quarter remains.	Beginning of April. Normal.	The low price of jute is responsible for the decrease in area. The weather has not been favourable for the cultivation and growth of the crop owing to drought followed by heavy rains, which damaged the crop especially in the Mangaldai subdivision. The present condition of the crop is not satisfactory and the outturn is expected to be less than that of last year.
Nowgong ..	50,000	20,400	26,100	6,000	..	Considerable jute remains.	First week of March. Early.	The increase in area is due to extension of cultivation. The weather at sowing time of the crop was not favourable but has improved since the middle of May. The present condition of the crop is fair and the outturn is expected to be better than that of last year.
Sibsagar ..	400	400	300	..	100	None ..	Middle of April. Normal.	Unfavourable weather conditions at sowing time account for the decrease in area. The weather has not been altogether favourable for the growth of the crop up to date but the present condition of the crop is reported to be generally fair, and the outturn is expected to be as good as that of last year.
Lakhimpur ..	1,000	900	800	..	100	None ..	First week of April. Normal.	The decrease in area is due to unfavourable weather at sowing time. The weather has not been favourable for the growth of the crop and the outturn is expected to be worse than that of last year.
Jaro Hills (Plains)	5,000	4,390	4,500	200	..	None ..	First week of April. Normal.	The weather has been favourable for the cultivation and growth of the crop. The present condition of the crop is good and a better outturn than that of last year is expected.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 6th July 1932.

Summary.—The rainfall was generally seasonable. More rain is, however, needed in some of the western districts. Weeding of autumn paddy and jute continues. Preparation of land for winter rice and of its sowing in seed beds are proceeding briskly. The prospects of standing crops are on the whole fair. Distress continued in Pabna and the Tangail subdivision of the Mymensingh district, the number of persons attending the test relief works in these places being 732 and 151 respectively. Three persons only received gratuitous relief in Mymensingh. Relief works in other districts have been stopped. The average price of common rice for the Province has risen by 0·12 per cent. as compared with that of the previous week.

IMPERIAL TABLE XIV.—Literacy of selected castes, tribes, races and social groups by locality and sex.

This table, corresponding to imperial table IX of 1921, gives for selected groups figures for Bengal (including states) and Sikkim similar to those in imperial table XIII. The necessity of public economy has reduced the number of groups shown in the table from 89 to 41, but it has been attempted to make the table within this restriction as representative as possible. For comparison with each other and with the figures given for Muslims in imperial table XIII, particulars are here given of two Muslim social groups, Jolahas and Sayyads. The figures for Anglo-Indians and Indian Christians render possible comparisons with other communities, after eliminating the distortion introduced by the inclusion of Europeans and others in the figures of Christians given in table XIII. The table also contains figures for groups constituting the "upper classes" of Hindu society (Brahmans, Baidyas and Kayasthas) and representing the "depressed classes" (Bagdis, Bauris, Chamars, Dhobis, Doms, Haris, Jaliya-Kaibarttas, Kalus, Namasudras and Sunris), aboriginals and hill tribes (Chakmas, Garos, Lepchas, Mrus, Mundas, Oraons, Santals and Tiparas), the trading classes (Agarwalas and Shahas), artisans and functional groups (Kamars, Kumhars, Jogis and Napits), typical cultivators of West Bengal (Mahishyas), an immigrant caste of Nepal (Khambus—chosen because it was hoped that returns for this caste would be less inaccurate than those for such groups as Khas, Mangars, etc.) and a sectarian caste (Baishnab). Separate figures are given for members of aboriginal or hill tribes professing different religions. Figures for Kalus are included in imperial table XVII with those for Telis but are here given separately for comparison with former years.

2. Of the groups shown, Agarwalas mainly reside in Calcutta. Bagdis, though found throughout the whole of Bengal, are most numerous in the Burdwan and Rajshahi Divisions. Mundas, Oraons and Santals are principally found in West, Central and North Bengal. Chakmas and Mrus are practically confined to Chittagong and the Chittagong Hill Tracts, Garos to Mymensingh, Khambus and Lepchas to Darjeeling and Sikkim and Tiparas to the Chittagong Hill Tracts and Tripura State. Anglo-Indians are rarely found outside Calcutta and other towns. Other groups are dispersed in considerable numbers throughout all parts of the province. More detailed particulars of local distribution are given in imperial table XVII.

3. The statement below shows by sexes for 21 of the groups given in the table, the total population aged 7 and over. For these groups the total figures of literates in the table exclude those so returned who are under 7 years of age.

4. For the remaining 20 groups shown in the table but not included in paragraph 3, the figures of literates in the table include in addition to those aged 7 and over also those aged 4–6 years except in the districts of Rajshahi, Dinajpur, Jalpaiguri, Rangpur, Bogra and Pabna, the Siliguri subdivision of Darjeeling and Cooh Behar State. For comparison with the figures given in the statement above, a supplement printed below the table shows for these 20 groups the total population and literates aged 7 years and over in the districts just mentioned.

5. A further analysis of Indian Christians by age-group and sex is given in the report volume, where they are further divided according to their racial, tribal or provincial affiliations.

6. The total population given for the groups in the table differs in some instances from that shown in imperial table XVII. The reason for this is that the figures in imperial table XVII include a number of doubtful returns classified after the preparation of this table had been undertaken.

RESOLUTION—No. 8996L.R.

Read—

The Survey and Settlement Reports for the year ending 30th September 1931.

The main traverse work consisted of 583½ square miles in Hooghly and post-pointing traverse for air survey of

740½ square miles in Rangpur. Traverse was also done of scattered areas totalling 421 square miles during the year. In Hooghly, work was delayed by frequent sickness among the field staff. Other work done by the Survey Department included demarcation, comparative mapping, and reproduction of maps. Though the number of sheets printed was less than usual it came to over 737,000.

2. Major settlement operations were in their closing stages in the districts of Murshidabad-Birbhum, but were in full swing in 24-Parganas, Burdwan-Hooghly and Malda.

3. In Malda the area under cadastral survey (Block B) was 781 square miles. Owing to dense jungle along the banks of the rivers Mehananda and Kalindri and the mango gardens, which cover over

32 square miles in this block, only about 62 per cent. of the area could be done by air survey instead of 90 per cent. as originally intended.

4. The total area in the province for which a record-of-rights has been completed is 53,797 square miles out of 65,094 square miles to which the Bengal Tenancy Act applies. Over a million copies of printed records (khatians) were sold during the year, and the receipts for sales of maps, plot indices and khatians together came to Rs. 82,632.

5. It is satisfactory that out of the total recovery of Rs. 16,41,595 only Rs. 2,90,139 was realised by coercive measures and the balance represents voluntary payments.

6. Mr. L. R. Fawcus, I.C.S., was in charge of the Department till 9th January 1931, when Mr. J. B. Kindersley, I.C.S., took over and remained in charge for the rest of the year. The Governor in Council has much pleasure in acknowledging the efficiency and care with

which the Departments of Survey and Settlement have been managed in the year under review. His Excellency in Council is also pleased to direct that the good work done by the Survey Officers, Mr. I. Newton and Major C. B. Sexton, the Settlement Officers, Messrs. B. E. J. Burge, M.O. Carter, P. D. Martyn, K. A. L. Hill, S. N. Roy (II), Rai Bijay Bihari Mukharji Bahadur and Rai Romesh Chandra Sen Bahadur and the Cadastral Charge Officer of Burdwan, Mr. A. Hughes, as also by the other officers mentioned in the concluding paragraphs of the Survey and Settlement Reports be recorded.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*.

CALCUTTA, THE 16TH JULY 1932.

RESOLUTION—No. 9057 L.R.

Read—

Letter No. 83 M.C.T., dated the 1st June 1932, from the Commissioner of the Rajshahi Division, submitting a final report on the flood of July and August 1931 in the district of Bogra.

The report deals with the operations for the relief of distress caused by the flood which began in the Bogra district on the 24th of July and lasted for twenty-three days. The district consists mainly of two distinct areas—the western portion known as Khair area and the eastern portion known as the Pali. Winter paddy is the only important crop grown in the Khair area and the principal crops of the Pali area are jute, aus and aman rice. Boro and Katar paddy and rabi crops are also grown in this area. The economic condition of the people of this area was not good, owing to the fall in the price of jute and other agricultural produce since 1929. Distress already prevailed in the eastern part of district, owing to the fall in prices and the flood of 1930, which seriously damaged much of the aman paddy. The flood of July and August 1931 was the severest on record and appears to have been due to the fact that the Jamuna or Brahmaputra was in high flood at a time when the local rainfall was very heavy. During the month of July there were 20.25 inches of rainfall as against 9.36 inches and 9.09 inches in the two previous years. The highest level was reached on the 1st August 1931 and it was $3\frac{1}{2}$ feet higher than the water level of ordinary years. Only the eastern portion of the district known as the Pali area was affected by

the flood. Out of the total area of the thanas concerned, viz., 421,064 acres with a population of 562,726 an area of 278,170 acres with a population of 383,153 was seriously affected. About half the aus paddy had been reaped before the flood, but a portion of this was also damaged. Newly transplanted paddy and seedlings were destroyed by submersion and most of the ordinary broadcast aman paddy was either destroyed or severely damaged. Much of the jute, however, survived the flood. Katar aus paddy was sown extensively after the flood and reaped in November, and it was possible to retransplant aman paddy in a considerable area. A few cattle were lost and a number of huts collapsed within the jurisdiction of Dhunat and Sariakandi police-stations. Though there was no loss of human life directly due to the floods, an epidemic of cholera broke out subsequently in the flooded area. The epidemic was confined to an area of 18 miles by 12 miles, and the measures taken checked the spread of the epidemic and brought it under control. Twenty Sanitary Inspectors and one doctor of the district board worked under the control of the District Health Officer. Four doctors were also sent to the area by the Public Health Department. Sixty-eight thousand persons were inoculated.

2. The Hon'ble Sir B. B. Ghosh, Member of the Executive Council, with the Member, Board of Revenue, and the Secretary of the Revenue Department visited part of the distressed area on the 8th September 1931. The Divisional Commissioner and the Director of Agriculture also visited the affected area.

3. Relief measures were promptly undertaken by Government and the district board. The main forms of relief consisted of :—

Gratuitous relief.—Gratuitous relief was given at first by the district board. Gratuitous relief was distributed by Government through 33 distributing centres. Relief was given chiefly in the shape of cash and doles of rice and cloth. The amount spent through all the sources amounted to Rs. 7,520, out of which Government contributed Rs. 4,297, the balance being contributed by the district board and by private persons. Private organisations did good work and co-operated with the

Government relief committees. Acute distress continued up to the harvesting of Katar aus and aman paddy, after which the situation improved and further distribution of gratuitous relief was not necessary.

Test relief.—Test relief works were started after the flood water subsided. The works consisted of the construction and repair of roads. About 24 miles of new katcha roads were constructed and about 51 miles of old roads were improved by employing 43,549 units at a total cost of Rs. 9,056. The entire amount was advanced by Government.

Agricultural loans.—A sum of Rs. 1,00,000 was sanctioned by Government for Agricultural loans. Out of this a sum of Rs. 99,299 was distributed by the District Officer during the period from August 1931 to March 1932.

4. The Governor in Council is satisfied that the measures taken for relief of distress were successful and adequate. He desires to record his appreciation of the good work done by Rai Anath

Bandhu De Bahadur and Mr. S. N. Roy, I.C.S., the former Collectors of the district, Rai A. K. Mukherji Bahadur, the present Collector, Babu Jagadish Chandra Bardhan, Maulvi Hashmutullah, Babu Monaranjan Das Gupta, Maulvi Khondkar Abdul Latif and Babu Birendra Kumar Bose, Sub-Deputy Collectors, Babu Sasanka Sakar Chakrabarty, probationary Sub-Deputy Collector, Babu Prafulla Chandra Banerji, Manager, Jaipur Government Estates, the District Health Officer and the local relief committees. He also desires to acknowledge the readiness with which the chairman and the vice-chairman of the district board and the District Engineer co-operated with the Collector.

ORDER—Ordered that this resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

H. C. V. PHILPOT,
Secy. to the Govt. of Bengal.

In addition to the details required on the previous page, information should be given below under the following heads:—

(a) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the District Board has taken or has agreed to take, in order to make good the deficiency.

(b) Possible means on increase in the revenues of the District Board.

(c) A statement of all outstanding loans specifying, in respect of each loan, the date when taken, the purpose (very briefly), the amount, the annual charges involved, and the amount still payable.

(d) Any explanations in regard to receipts and expenditure to show the true financial position of the District Board when such position is otherwise than the ordinary surplus would indicate.

There will be enhancement of income in the shape of increased cess receipts in the near future when the settlement operations are final, leaving surplus, sufficient annually, for repayment of the loan in yearly instalments.

Increase in cess revenue with the revaluation consequent upon the settlement of the district records, that has advanced much already.

**Monthly Weather and Crop Report of Bengal for
June 1932.**

I. Character of the season.—During the month under review, the rainfall was below the average, except in Hooghly, Rajshahi, Jalpaiguri, Darjeeling, Malda, Chittagong, Chittagong Hill Tracts, and Cooch Behar State, where it was above the normal. The usual rainfall statement is appended.

II. Progress of agricultural operations.—Preparatory tillage for winter paddy and of its sowing in seed-beds continued favourably. Reaping of low-land jute commenced in some districts of East Bengal.

III. State of standing crops.—Standing crops generally thrived well.

IV. Prospects and probable outturn.—The outlook of deep-water paddy and sugarcane is favourable, on the whole. A satisfactory outturn of autumn paddy may be expected.

V. Damage to standing crops.—No appreciable damage to standing crops was reported from any part of the Province.

VI. Condition of agricultural stock.—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease, however, were reported from ten districts of the Province.

VII. Failure of pasturage and fodder.—The supply of fodder was reported to be generally sufficient.

VIII. Prices of feed-grains.—During the second fortnight of the month, the retail prices of common rice of the cheapest quality rose in seven districts, fell in seven and remained stationary in the rest of the Presidency. The prices varied from 15½ seers per rupee in Midnapore to 10 seers in Darjeeling and the Chittagong Hill Tracts.

IX. Condition of agricultural population.—The condition of the agricultural population is not satisfactory owing to fall in the prices of jute and other staples. Distress prevails in parts of Rangpur, Bogra, Pabna and Mymensingh, where test and other relief works are continuing.

**DEPARTMENT OF AGRICULTURE,
BENGAL.**

Dacca, the 27th July 1932.

**Forecast of the Summer Til (Sesamum) crop of
Bengal, 1932-33.**

(NOTE.—On an average of the five years ending 1929-30, the area under til in Bengal has represented some 2·6 per cent. of the total area under til in British India.)

Character of the season.—At the outset the weather was not favourable for sowing and for the early period of growth. Good weather which prevailed from the middle of April helped the subsequent germination and growth, especially in the important districts of Mymensingh, Faridpur

and Tippera. On the whole the season was a satisfactory one for the crop.

Acreage.—The area sown this year is estimated at 109,900 acres as against 111,700 acres last year.

Outturn.—From the District Officers' estimates the average outturn of the crop for the Province works out at 82 per cent. of the normal this year as against 70 per cent. last year.

Taking the normal yield as 7½ maunds per acre, the gross outturn of the crop for the Province is estimated at about 24,500 tons this year as against 17,200 tons last year or an increase of about 42 per cent. over last year.

Director of Agriculture, Bengal (offg.).

Resolution on the Report on the Police Administration in the town of Calcutta and its suburbs for the year 1931.

GOVERNMENT OF BENGAL.

Police Department.

CALCUTTA, THE 2ND AUGUST
1932.

RESOLUTION—No. 3516Pl.

Read—

The Report on the Police Administration in the town of Calcutta and its suburbs for the year 1931.

The office of the Commissioner of Police was held from 1st January to 4th March by Sir Charles Tegart and from the 5th March to the end of the year by Mr. L. H. Colson, I.P.

2. Strength. — The sanctioned strength of the Calcutta Police at the close of the year was, 5,658, a decrease of 89 as compared with last year's figure. The number of resignations was 18 against 51 in the previous year. There was a decrease of 5 in the number of vacancies at the end of the year, and the Governor in Council is pleased to note that the revised rates of pay continue to attract a better type of recruit to the force. His Excellency in Council also observes with satisfaction that, in spite of the continuous strain placed upon all ranks owing to the civil disobedience movement and its after effects, there was a further improvement in the health of the force during the year, the average daily percentage of the sick falling from 1.92 to 1.52.

3. Housing.—The Commissioner of Police has again remarked on the unsatisfactory condition of the police buildings in the suburban areas and the necessity for their early improvement. His Excellency in Council regrets that improvement in this direction should still be held up owing to financial stringency.

4. Discipline.—A good standard of discipline continued to be maintained and the small number of cases in which

judicial punishments were inflicted on members of the force, or in which orders of dismissal or degradation were passed, is noticeable.

5. Crime statistics.—There was a substantial all round decrease in the total number of cognisable cases reported to the police during the year. The marked fall in the number of rioting cases, which was 18 against 103 in the previous year, was due to the calling off of the civil disobedience movement.

The Detective Department as usual rendered valuable assistance to the local police and investigated a number of difficult cases very successfully. His Excellency in Council notes with pleasure the smart work done by the special detective staff of the Port Police in detecting a number of arms smuggling cases and in arresting a number of terrorists with unlicensed firearms in their possession.

6. Revolutionary crime, seditious speeches and meetings.—Terrorist activities continued throughout the year. Mr. R. R. Garlick, District and Sessions Judge, 24-Parganas, was murdered in his court-room, an attempt was made on the life of Mr. Villiers, President of the European Association, Bengal, and one Ashutosh Neogi, who had given important evidence for the Crown in an armed dacoity case, was murdered. As in the previous year, the Indian press not only continued its support of the Congress but also with a few exceptions its campaign of eulogy of political murderers. It is significant that a representative and responsible body like the Corporation of Calcutta passed a resolution expressing its "sense of grief" at the execution of Dinesh Gupta, one of the murderers of Colonel Simpson, Inspector-General of Prisons. There were a number of prosecutions for seditious speeches and no less than 75 publications were proscribed. The circulation of communist literature continued.

7. Public order.—Throughout the year, picketing was continued with varying intensity, and there were frequent *hartals*, processions and public meetings in furtherance of the Congress campaign against Government, while the difficulties of the situation were in no way diminished by the Irwin-Gandhi agreement which tied the hands of the authorities but was utilised by Congress as an opportunity to reorganise and

prepare for fresh activities. The most disquieting feature of the situation was the constant extolling of political assassins as martyrs and heroes by the press and nationalist leaders, while on the other side the murders themselves and the way in which murderers were eulogised naturally evoked intense feelings of indignation especially among the European community. Added to this was the general lawlessness which was an aftermath of the Civil Disobedience Movement.

The burden which in this tense political atmosphere was placed on the shoulder of the police in 1931 was thus a heavy one. His Excellency takes this opportunity of expressing his high appreciation of the steadfastness, loyalty, courage and devotion displayed by all ranks of the force in the discharge of their duties in such difficult circumstances.

8. Traffic.—The general trade depression was reflected in the returns of the Motor Vehicles Branch. The registration of private cars alone dropped by one-third. Only 46 new taxi-cabs were registered in 1931 as compared with 122 and 263 in the two previous years and only 106 new motor omnibuses as compared with 168 and 226. It is satisfactory that considerably fewer cases under the Motor Vehicles Act were pending at the close of the year than there were in 1930.

9. Commendation of officers.—His Excellency in Council is gratified to read the tributes paid by Mr. Colson to his Deputy Commissioners, Assistant Commissioners and other subordinate officers. 1931 was less fraught with violence than 1930, but the situation was never free from anxiety, and the Calcutta public may well be grateful to all ranks of the Calcutta Police force for their constant vigilance and for the care and attention which they devoted to their duties. The thanks of Government are due to Mr. Colson for maintaining the high standard of efficiency which he inherited from his predecessor.

ORDER.—Ordered that a copy of this resolution be forwarded to the Commissioner of Police, Calcutta, the Chief Presidency Magistrate, Calcutta, and the Commissioner of the Presidency Division, for information.

Ordered also that a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

Resolution on the Report of the Director of Public Health, the Sanitary Board and the Chief Engineer, Public Health Department, for the year 1930.

CALCUTTA, THE 8TH AUGUST 1932.

RESOLUTION—No. 1698 P.H.

Minister-in-charge: The Hon'ble Mr. Bijoy Prasad Singh Roy.

Read—

The Report of the Director of Public Health, the Sanitary Board and the Chief Engineer, Public Health Department, for the year 1930.

Vital statistics.—The vital statistics per mille in the Report on Public Health for 1930 are still based on the census figures for 1921, an anachronism necessitated by the want of any reliable data for annual adjustment of the figures for population. The preliminary census returns for 1931 illustrate the margin of error in the annual vital statistics referred to in this Resolution last year. The population of Bengal, excluding the Chittagong Hill Tracts, appears in the 1931 census as 49,909,363 against 46,522,293 in the census of 1921 showing an increase of 3,387,070.

The increase in population for the same area during the same period derived from the annual returns of births and deaths is only 1,463,471. Local movements of population in and out of the province affect the figures for increased population, but cannot by any stretch be made to cover more than a small fraction of this difference between the census and registration results. Defective as the annual returns are known to have been, especially where responsibility for them has been transferred from the police to presidents of union boards, a margin of error of over 100 per cent. on the registration figures for increased population brings prominently to notice the seriousness of their defects. Reduced to an annual margin of error on births the figures are not quite so surprising as they seem at first

sight, but they do mean approximately that the increase of population in 1930, as in previous years, may or may not have been at least double and in some years must have been more than double that reported by the Director of Public Health on the basis of registration returns. Or, to particularise further, the figures for 1930 (viz., births 1,237,931, deaths 1,044,256, increase of population 193,675) are in all probability vitiated by a defect of error between 10 and 20 per cent. on the reported births. This inaccuracy can only be overcome by insistent pressure on presidents of union boards and municipal authorities and rural and urban sanitary inspectors to discharge more effectively the unattractive but important routine duties of verifying birth and death returns subject to this general inaccuracy. The figures for 1930 show a decrease of 123,347 births and of 50,007 deaths on those for 1929; and it appears that apart from Calcutta the seven districts showing an excess of deaths over births in 1930 comprise a block in the centre of the province from Jessore to Dinajpur. It is noticeable that they do not include any in the Burdwan Division.

Infant mortality.—It cannot be said that on the statistics for the province as a whole there has been much improvement in infant mortality. The total number of deaths reported under one year of age decreased from 244,000 to 231,000; but the rate per thousand births rose from 179.9 to 187.3. The maternity welfare work conducted by the Health Department of the Calcutta Corporation and by a voluntary association in Dacca continues to show what can be done in urban areas by the necessary organisation with a permanent paid staff. There are movements in the same direction in one or two district headquarters towns; but for the most part maternity welfare work even in municipal areas does not go much beyond the annual baby week with its lectures and exhibitions, of which there were 180 in this year, and the local training of dais; while in the rural areas it is still more difficult to effect much practical impression. The number of dai training classes outside Calcutta and Dacca increased to 98 and of dais attending to 1,113—less than one dai given elementary training per 1,000 births in the year. But though the actual figures are still far

from encouraging, the fact remains that the consciousness of the need for maternity welfare work exists and is on the increase throughout the province.

Cholera.—The statistics for cholera and small-pox continue to show parallel features. The year 1928 was a peak year for both, and the sharp decrease appearing in 1929 was continued in 1930. The deaths from cholera were 54,963 as against 81,090 in 1929, and had fallen from twice the quinquennial average in 1928 to 33 per cent. below the quinquennial average. It would be interesting to know whether the curve of the decline compared with that of earlier epidemics can be brought into any specific relation with the use of the new methods of inoculation now so readily accepted where cholera is prevalent. Dacca was the only district which did not share in the decrease of cholera. As usual the public health resources of the district boards were supplemented as occasion required by advice and assistance from the Public Health Department in co-operation with local epidemics. 1,184,415 cubic centimetres of anti-cholera vaccine were issued against 1,718,610 in the previous year and 1,021,541 inoculations performed against 1,566,150. 82,100 wells and 28,840 tanks were also disinfected over and above 2,982 river ghats and other sources of water. The Public Health Department also organised the provision of facilities for inoculation against cholera of pilgrims proceeding to the important festivals, such as the Kumbh Mela, the Puri Rathjatra and the Ganga Sagar Mela. The continued absence of cholera at the Ganga Sagar Mela is a conspicuous instance of what can be done for public health on these occasions by the organised co-operation of district board and Public Health Department.

Small-pox.—There were 3,150 deaths from small-pox in towns and 8,118 in rural areas against 1,003 and 19,404, respectively, in the previous year. The respective death-rates were 1.01 and .19 against .32 and .44 in 1929, showing an increase of 215.6 per cent. in towns and 56.8 per cent. in rural areas. With the downward curve continuing small-pox was a comparatively small factor in the mortality in rural areas for 1930, but if the Director of Public Health is correct in forecasting the trend of this epidemic, the figures

should soon be on the rise again. Unfortunately the figures for infant vaccination were allowed to fall off with the decrease of the epidemic—only 253 infants per 1,000 births being successfully vaccinated during the year as against 280 in the previous year. The Director of Public Health reports that nine municipalities including two with a large labour population carried out no vaccination in 1930, a failure which requires further investigation. The vaccination statistics for the province show a decrease throughout (except under the head of children between one year and six years); but this was perhaps inevitable in view of the marked decrease in small-pox and the postponement for financial reasons of projects for universal vaccination of the population in a limited period.

Malaria and Kala-azar.—In last year's Resolution attention was drawn to the fact that mortality from malaria had been more than halved since the figures for the maximum year 1921, when 737,000 deaths were ascribed to this cause. There was an almost imperceptible reaction in 1930 with 336,879 deaths against 335,414 in the previous year. While, on the other hand, the returns under the other heads of fever which must probably include a certain amount of malaria showed a slight further decrease of 338,399 against 350,273. These figures certainly tend to strengthen the impression mentioned last year that some permanent result has been achieved by the intensive campaign against malaria in the last ten years in effecting a genuine reduction of this disease, though doubtless it will have its fluctuations in the future as in the past. The figures for death from kala-azar for the last three years have been stable with a very slight upward trend, the number of deaths from this cause in 1930 was 10,914 or 94 in excess of the previous year. At the same time the number of cases treated continues to decrease (110,017 in 1930) which is to be explained perhaps as well by variations in the number of special centres as in the prevalence of the disease.

Rural health units.—The scheme for the organisation of rural health units has now reached saturation point, with 575 sanitary inspectors or assistant health officers, each in charge of an area corresponding to a thana. The cost of the scheme to Government in

the year under review was Rs. 9,40,000 and it will be some time before the effect of incremental pay and expansion of activities brings the demand for grants up to the full allotment originally contemplated of Rs. 12,00,000. The working of these units has been mentioned in the Resolution on district boards, and it is sufficient for the purpose of this Resolution to mention the value of this additional force when occasion arises to mobilise all available resources under the direction of the Director of Public Health to cope with special emergencies. The district boards have, on the whole, shown great readiness to co-operate with the Director of Public Health in making the best use of rural sanitary inspectors and to accept his advice on the technical aspect of this organisation.

Educational Propaganda and Publicity.—Four hundred and eighty-six lectures on public health were delivered throughout the province by the publicity staff under the Public Health Department with or without lantern slides. The extensive health propaganda carried out by the staff resulted in the organisation by some district boards of their own propaganda departments under their respective Health Officers. It is hoped that when financial conditions improve other district boards will organise similar propaganda departments with a view to educating the rural people in public health matters.

Public health engineering.—In works of public health engineering it is the beginning and completion that counts and in this light the outstanding event of the year 1930 was the start made with the Bhatpara Sewerage Scheme estimated to cost Rs. 22,00,000. Otherwise the most important work under construction during the year, though not formally

completed till after its close, was the Asansol Water-supply Scheme Rs. 4,50,000. Improvements in the water-supply of Dacca, Faridpur, Patuakhali and Bansberia municipalities were completed and a beginning was made with water-supply works at Chandpur, Narayanganj and English Bazar. Estimates were prepared in various stages for new works up to a total of Rs. 31,00,000, only a fraction of which, it is to be feared, will now materialise in sanction and expenditure. The criterion of activity afforded by actual expenditure during the year on works under construction under the supervision of the Chief Engineer does not however seem to have been provided for in the form of this officer's report and might be introduced.

Personal.—Dr. C. A. Bentley made over charge of the office of Director of Public Health during the year after a tenure of office of 15 years which has made an indelible impression on the public health record of Bengal. It would be difficult to say how much the whole spirit of public health work in this province owes to Dr. Bentley's personal impetus. He was succeeded by Dr. Khambata who has twice previously acted in this capacity: while Mr. Griffin remained in charge of the post of Chief Engineer, Public Health Department. To both these officers the Minister desires to express his appreciation of the results of the year.

**Resolution on the Annual Report of the Bengal Smoke Nuisances
Commission for the year 1931.**

GOVERNMENT OF BENGAL.

Commerce Department.

CALCUTTA, THE 5TH AUGUST 1932.

RESOLUTION—No. 4481Com.

Read—

The Annual Report of the Bengal Smoke Nuisances Commission for the year 1931.

The report records steady progress in the abatement of smoke in Calcutta and environs. During the year the Commission was able to secure a further reduction in the emission of daily black smoke; the average emission from each factory chimney, which, during the previous year was the equivalent of 18 minutes of dense black smoke per hour, was reduced to 08 minutes during the year. This is by far the lowest figure yet recorded.

The great increase in the number of the inspections and tests made for educational purposes, and the number of the cases observed, coupled with a decrease in the number of statutory warnings issued and the continued absence of prosecutions, testifies to the continuance of the good and useful work carried on by the Commission in co-operation with the interests concerned. It is unfortunate that owing to financial stringency it has not been possible for Government to give effect to several recommendations made by the Commission for increasing the scope of its activities.

The thanks of the Governor in Council are due to the members of the Commission, and to Mr. R. Grant, the Chief Inspector and Secretary, and his assistants for a successful year's work.

By order of the Governor in Council,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 11th August 1932.

First Forecast of the Sugarcane Crop of Bengal, 1932-33.

(NOTE.—On an average of the five years ending 1930-31, the area under sugarcane in Bengal has represented some 7·0 per cent. of the total area under sugarcane in British India.)

Character of the season.—At the outset the weather was generally favourable for planting of

the crop in East Bengal districts, while insufficient rainfall interfered with the progress of the operation in some West and North Bengal districts. Good weather which prevailed from the latter part of April helped germination and growth. The present prospects, so far, are reported to be satisfactory, on the whole.

Area planted.—The total area planted with sugarcane for the province is reported to be 229,000 acres this year as against 200,300 and 233,400 acres reported in the corresponding and final forecasts of last year.

**DEPARTMENT OF AGRICULTURE,
BENGAL.**

Dacca, the 9th August 1932.

**First Forecast of the Cotton crops of Bengal,
1932-33.**

(NOTE.—On an average of the five years ending 1930-31, the area under the cotton crops in Bengal has represented some 0.2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore. As the late crop has not yet been sown, this forecast deals only with the early crop.

Character of the season.—In Bankura, Mymensingh and Tripura State, the weather was generally favourable. In Mymensingh subsequent conditions were not so favourable, and the outturn therefore seems poor. In Midnapore and the Chittagong Hill Tracts the weather was not favourable, and the condition of the crop seems to be fair for the former district only. The outturn is expected to be poor in the Chittagong Hill Tracts for want of timely rainfall. The condition of the crop at present is fair, on the whole.

Area sown.—The area sown is reported to be 74,345 acres this year as against 74,312 acres in the corresponding forecast of last year. The slight increase is due to general causes.

CALCUTTA, THE 12TH AUGUST 1932.

RESOLUTION—No. 10272L.R.

Read—

The Report of the Board of Revenue on the administration of the Wards, Attached and Trust Estates in the Presidency of Bengal for the year 1337 B.S. (1930-31).

1. At the beginning of the year the number of estates under the management of the Court of Wards was 90. During the year nine new estates were brought under the charge of the court and one was released; thus the total number was 98 at the close of the year.

2. The total current demand due to the estates on account of rent and cesses was Rs. 1,55,39,565 and the arrear demand Rs. 1,93,68,227. The total sum collected was Rs. 1,20,26,246 or 34·4 per cent. of the total demand or 77·4 per cent. of the current demand against 41·3 per cent. or 88·2 per cent., respectively, in the preceding year. The heavy outstanding balances were mainly due to bad economic conditions.

3. The total amount of ascertained debt outstanding at the close of the year was Rs. 2,50·30 lakhs against Rs. 2,07·84 lakhs in the preceding year.

This total includes Rs. 156 lakhs owed by three big estates. The principal and interest paid or otherwise reduced amounted to Rs. 26·46 lakhs and Rs. 15·17 lakhs, respectively. In 22 out of 26 estates for which schemes of repayment have been prepared, it has not been possible to reduce the debts to the extent provided in the schemes. The debts of the 62 estates, which still remain in debt, have been reduced on the average by about one quarter since they came under the court. Many of these estates have been taken charge of recently.

4. The percentage of cost of management on current rent and cess demand showed a satisfactory reduction, being 9·2 against 11·9 in the previous year. The law expenses rose to Rs. 7·98 lakhs from Rs. 6·65 lakhs in 1929-30.

5. The Governor in Council notices with satisfaction that nearly Rs. 4 lakhs as against a little over Rs. 3½ lakhs in the preceding year was spent on education, dispensaries and works improvement.

6. During the year under review, owing to the widespread economic distress and to the fall in the price of agricultural produce, collections were poor and in many cases Government revenue was in arrear and general and audit rates remained unpaid. The Board has however taken steps to avoid such arrears, and it is hoped that this will not recur in future.

7. The thanks of the Governor in Council are due to the Board of Revenue for the administration of the estates under the management of the Court of Wards. He also notices with pleasure the good work done by the Managers mentioned in the report.

By order of the Governor in Council,

H. C. V. PHILPOT,

Secy. to the Government of Bengal.
